

## Kindred Healthcare selects Allscripts dbMotion to Fulfill "Continue the Care" Vision from Hospital to Home

July 11, 2013

### Kindred to use dbMotion to coordinate care across three business units in more than 40 states

CHICAGO, July 11, 2013 /PRNewswire/ -- Kindred Healthcare, Inc., headquartered in Louisville, KY, has selected the [dbMotion](#) interoperability platform to share patient information throughout the entire care episode from hospital to home fulfilling the Patient-Centered Care Model for Kindred's "Continue the Care" vision.

"Allscripts is providing Kindred with a solution that will help enable the organization to better manage patient care across its sites and business units," said Paul M. Black, President and Chief Executive Officer of Allscripts. "This technology will give Kindred's caregivers access to enhanced analytics, allowing them to provide more effective and efficient care for the communities it serves."

Kindred is partnering with hospitals and other healthcare providers to develop a more quality-driven, patient-centered and efficient healthcare system. dbMotion will create a virtual single patient record for three of Kindred's divisions – Transitional Care Hospitals, Nursing and Rehabilitation Centers and Kindred at Home. With the dbMotion technology, Kindred will harness harmonized data, aggregated from across the connected community, to improve care and care transitions. Using dbMotion, Kindred expects to realize better clinical, operational and financial outcomes to help drive efficiencies across the organization.

"We chose dbMotion to more effectively coordinate and minimize gaps in care throughout a patient's entire episode – from hospital to home," said Rick Chapman, Kindred's Executive Vice President, Chief Information Officer and Chief Administrative Officer. "Our goal is to partner with other healthcare providers to enable full recovery and to prevent readmissions. With access to a patients' entire longitudinal record, dbMotion will help us do just that."

In addition to helping manage care transitions, dbMotion will help Kindred's referring organizations meet Meaningful Use 2 attestation by supporting transitions of care through standards-based information exchange and clinical workflow tools.

Kindred Healthcare, Inc. is a healthcare services company that through its subsidiaries operates hospitals, nursing centers, hospice and home health locations, and a contract rehabilitation services business in 46 states across the United States.

Allscripts acquired dbMotion in March 2013.

#### Forward-Looking Statements

*This press release contains forward-looking statements within the meaning of the federal securities laws. Statements regarding future events or developments, our future performance, as well as management's expectations, beliefs, intentions, plans, estimates or projections relating to the future are forward-looking statements with the meaning of these laws. These forward-looking statements are subject to a number of risks and uncertainties, some of which are outlined below. As a result, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what impact they will have on our results of operations or financial condition. Such risks, uncertainties and other factors include, among other things: the possibility that our current initiatives focused on product delivery, client experience, streamlining our cost structure, and financial performance may not be successful, which could result in declining demand for our products and services, including attrition among our existing customer base; the impact of the realignment of our sales and services organization; potential difficulties or delays in achieving platform and product integration and the connection and movement of data among hospitals, physicians, patients and others; the risks that we will not achieve the strategic benefits of the merger with Eclipsys Corporation (Eclipsys) or our acquisition of dbMotion, Ltd. (dbMotion), or that the Allscripts products will not be integrated successfully with the Eclipsys and dbMotion products; competition within the industries in which we operate, including the risk that existing clients will switch to products of competitors; failure to maintain interoperability certification pursuant to the Health Information Technology for Economic and Clinical Health Act (HITECH), with resulting increases in development and other costs for us and possibly putting us at a competitive disadvantage in the marketplace; the volume and timing of systems sales and installations, the length of sales cycles and the installation process and the possibility that our products will not achieve or sustain market acceptance; the timing, cost and success or failure of new product and*

*service introductions, development and product upgrade releases; any costs or customer losses we may incur relating to the standardization of our small office electronic health record and practice management systems that could adversely affect our results of operations; competitive pressures including product offerings, pricing and promotional activities; our ability to establish and maintain strategic relationships; errors or similar problems in our software products or other product quality issues; the outcome of any legal proceeding that has been or may be instituted against us and others; compliance obligations under new and existing laws, regulations and industry initiatives, including new regulations relating to HIPAA/HITECH, increasing enforcement activity in respect of anti-bribery, fraud and abuse, privacy, and similar laws, and future changes in laws or regulations in the healthcare industry, including possible regulation of our software by the U.S. Food and Drug Administration; the possibility of product-related liabilities; our ability to attract and retain qualified personnel; the continued implementation and ongoing acceptance of the electronic record provisions of the American Recovery and Reinvestment Act of 2009, as well as elements of the Patient Protection and Affordable Care Act (aka health reform) which pertain to healthcare IT adoption, including uncertainty related to changes in reimbursement methodology and the shift to pay-for-outcomes; maintaining our intellectual property rights and litigation involving intellectual property rights; legislative, regulatory and economic developments; risks related to third-party suppliers and our ability to obtain, use or successfully integrate third-party licensed technology; breach of data security by third parties and unauthorized access to patient health information by third parties resulting in enforcement actions, fines and other litigation. See our Annual Report on Form 10-K/10K-A for 2012 and other public filings with the SEC for a further discussion of these and other risks and uncertainties applicable to our business. The statements herein speak only as of their date and we undertake no duty to update any forward-looking statement whether as a result of new information, future events or changes in expectations.*
