Allscripts clinical platform to expand and deploy across the enterprise to enhance care and improve population health

CHICAGO, March 29, 2016 (GLOBE NEWSWIRE) -- University Hospitals (UH), in Cleveland, Ohio expanded and extended its commitment to Allscripts through 2024 to enhance patient care and improve population health management.

UH is one of the United States' leading academic healthcare systems, providing the largest network of primary care physicians, outpatient centers and hospitals across Northeast Ohio. The organization will expand its Allscripts Sunrise™ Clinical Manager platform in 9 hospitals that currently use the platform to include additional Sunrise modules, including surgery, anesthesia, radiology and mobility, providing a single clinical platform and integrated workflows for all stages of acute patient care. Additionally, UH will install the Sunrise clinical platform in 5 hospitals it has newly acquired over recent years.

Further, UH will increase its use of the Allscripts dbMotion™ interoperability and data aggregation solution, powering connectivity across the Northeast Ohio healthcare community. Because dbMotion harmonizes information from disparate clinical systems and brings actionable data to the point of care, UH will be positioned to more effectively coordinate care across settings.

"The continued collaboration between Allscripts and University Hospitals to achieve an integrated Sunrise platform will help improve clinical outcomes for our patients," Jeffrey Sunshine, M.D. Ph.D., Chief Medical Information Officer, University Hospitals. "Having a robust, single patient record across the continuum of our acute care will provide our physicians with the information they need to make crucial decisions regarding patient care."

Sunrise is an integrated suite of solutions for emergency, acute, ambulatory, revenue cycle and patient administration. Used by many of the leading hospitals and health systems in the world, Sunrise is a highly configurable solution that offers clinician-specific workflows that help drive adoption of clinical decision support that can lead to improved outcomes.

The dbMotion Solution is an industry-leading connectivity platform, and a critical component of Allscripts CareInMotion™ population health management platform. CareInMotion is a comprehensive, adaptable framework that enables healthcare organizations to address their specific population health priorities, such as care coordination, transitions of care and patient engagement.

"University Hospitals is taking a holistic approach to managing the care of its patients," said Chief Executive Officer, Paul Black. "By using a comprehensive and unified platform to manage care across all stages, the organization will deliver greater outcomes to its populations."

About Allscripts

Allscripts (NASDAQ:MDRX) is a leader in healthcare information technology solutions that advance clinical, financial and operational results. Our innovative solutions connect people, places and data across an Open, Connected Community of Health™. Connectivity empowers caregivers to make better decisions and deliver better care for healthier populations. About University Hospitals

Founded in May 1866, University Hospitals serves the needs of patients through an integrated network of 18 hospitals, more than 40 outpatient health centers and primary care physician offices in 15 counties throughout Northeast Ohio. At the core of our \$4 billion health system is University Hospitals Case Medical Center, ranked among America's best hospitals by U.S. News & World Report. The primary affiliate of Case Western Reserve University School of Medicine, UH Case Medical Center is home to some of the most prestigious clinical and research programs in the nation, including cancer, pediatrics, women's health, orthopaedics, radiology, neuroscience, cardiology and cardiovascular surgery, digestive health, transplantation and genetics. Its main campus includes UH Rainbow Babies & Children's Hospital, ranked among the top children's hospitals in the nation; UH MacDonald Women's Hospital, Ohio's only hospital for women; and UH Seidman Cancer Center, part of the NCI-designated Case Comprehensive Cancer Center at Case Western Reserve University. UH is the second largest employer in Northeast Ohio with 26,000 employees. For more information, go to www.UHhospitals.org.
