

Allscripts to deliver anesthesiology solution at the Royal Adelaide Hospital

November 15, 2017

Allscripts solution will offer an end-to-end dynamic AIMS solution at one of the world's most advanced major hospitals

ADELAIDE, Australia, Nov. 15, 2017 (GLOBE NEWSWIRE) -- Allscripts (NASDAQ:MDRX) has been appointed by South Australia Health to deliver its anesthesia information management system (AIMS) at the Royal Adelaide Hospital. The solution, the award-winning *iPro Anesthesia* from iProcedures, will provide a complete and continuous patient record anywhere anesthesia care is provided in the new 800-bed, state-of-the-art flagship hospital in South Australia.

The Royal Adelaide Hospital was completed in August this year and spans the equivalent of three city blocks. The hospital is part of latest addition to the specially designed Health Precinct and the site that includes more than 70 courtyards, terraces and sky gardens. It provides a comprehensive range of complex care across medical, surgical, emergency, acute mental health, outpatient and diagnostic fields. Allscripts Sunrise™ is an integral part of the EHR system at the Royal Adelaide Hospital and other South Australia Health hospitals in the region.

iPro Anesthesia is a cloud-based, mobile anesthesia information management system designed by anesthesiologists to automate anesthesia documentation and offer true clinician-driven functionality. A comprehensive end-to-end solution that produces a more complete, compliant and legible anesthesia record, it improves documentation, operating room efficiency, patient safety and medication management.

"The Royal Adelaide Hospital offers the latest innovations across health, education and research and has been established to offer the highest quality of patient care to South Australians," said Allscripts Managing Director Asia Pacific, David Chambers. "Our solution will streamline pre-operative, intra-operative and post-operative anesthesia workflow. With many anesthesia procedures being delivered outside of the operating room, mobility and the ability to document procedures on the patient's electronic record is critical."

Allscripts partnered with South Australia Health to deliver the Allscripts Sunrise product suite across the state of South Australia. The latest activation occurred on September 4 at the new flagship, 800 bed Royal Adelaide Hospital which replaces the old hospital originally built in 1841.

About Allscripts

Allscripts (NASDAQ:MDRX) is a leader in healthcare information technology solutions that advance clinical, financial and operational results.
