

EPSi Announces Release of Advanced Analytics Offering

December 3, 2019

New performance improvement analytics content and services

CHICAGO--(BUSINESS WIRE)--Dec. 3, 2019-- EPSi, Allscripts' (NASDAQ: MDRX) flagship budgeting, planning/forecasting, cost accounting and financial decision support platform, announced a new advanced analytics product and services solution to the marketplace. The Advanced Analytics platform provides "out of the box" business intelligence data visualizations that will enable hospital decision makers to analyze current performance, utilizing EPSi's flexible data model to incorporate a wide range of clinical, financial and operational data.

"As EPSi has continued to innovate on our flexible platform, we saw the need to offer new business intelligence capabilities to enable our clients to leverage the rich data in our fully integrated database, which can be further enriched through the use of our Data Extender tool to add even more data to patient records, service lines and more," said Ralph Keiser, CEO of EPSi. "We will now be able to deliver finished analytics packages, including bundled services and maintenance of the content, data mappings, and visualizations that enable our clients to jumpstart their BI efforts with state-of-the-art technology."

"EPSi recognizes the trending demand for innovative analytics that can elevate the financial literacy of organizations while also distilling the complexity of financial and clinical data into digestible, actionable insights to drive operational excellence and strategic growth," said Ryan Self, EPSi's Vice President of Services. "Through our initial work with our Advanced Analytics partners, we have already seen incredible results in how the tool is engaging and uniting executive leadership, operational managers, and clinical leaders to transform culture and operations."

About EPSi

EPSi is the industry leader in integrated healthcare decision analytics, budgeting, and planning solutions. More than 1015 installed hospitals in the U.S., including nine of the top 10 rated hospitals, 128 IDN systems, 40 global academic facilities, and international healthcare systems rely on EPSi for data-driven insight into managing costs and improving their long-range financial performance.
